E2
a handle bar fixed to the handle stems generally at a right angle with respect to the handle stems,

the handle bar arranged to be able to be held to operate the vehicle by an operator which operates the vehicle for a forward run on a back side of the steerable wheel and a backward run in front of the steerable wheel.

~~14. (Amended) A self-propelled vehicle comprising:~~

3
~~a driving portion which can be selectively switched between a forward driving mode and a backward driving mode,~~

~~the driving portion driving the vehicle forward when the driving portion is in the forward driving mode and driving the vehicle backward when the driving portion is in the backward driving mode,~~

~~a seat which is swivelable or removable, a steering portion which comprises at least one steerable wheel and at least one steering handle,~~

~~the steering handle being rotatable from one side of a hinge point to an opposite side of the hinge point,~~

~~whereby the vehicle can be operated forward or backward by an operator riding on the vehicle and the vehicle can be run backward with an operator not riding on the vehicle.~~
